

Conservation Plan for Cousins Way Recreation Park, Pulborough

Introduction: Cousins Way Recreation Park in Pulborough is a cherished community asset providing recreational opportunities for residents. This conservation plan focuses on ensuring the park's long-term preservation and enhancing its usability, with a primary emphasis on regular grass strimming to benefit dog walkers and sports users.

Regular Grass Strimming: To maintain the park's appeal and safety, we will implement regular grass strimming, performed at least once every two weeks during the growing season (spring to early autumn). This will prevent vegetation overgrowth and ensure well-defined pathways for park visitors.

Maintenance tasks:

1. Regular grass cutting.
2. Removal of grass clippings.
3. Inspection and repair of strimming equipment as needed.
4. Consideration of wildlife-friendly mowing practices, including areas for pollinators.

Funding and Resources: To execute this plan, securing funding from grants, donations and local businesses is essential.

Maintenance and Oversight: The Clerk and groundsmen will oversee the regular grass strimming. They will conduct inspections, gather feedback from park users and coordinate volunteers.

Conclusion: The Cousins Way Recreation Park Conservation Plan emphasises regular grass strimming to benefit dog walkers and sports users, ensuring the park remains an attractive and safe space for the community to enjoy for years to come.
