

## **Pulborough Main Recreation Park Conservation and Management Plan**

*Introduction:* Pulborough Main Recreation Park is a vital community space offering a wide range of recreational amenities, including green fields and various other facilities. This Conservation and Management Plan is designed to ensure the preservation and sustainable management of the park while addressing specific issues such as anti-social behaviour and traveller incursions.

**1. Park Assessment:** The green field is currently in good condition but requires regular maintenance, including grass cutting and trimming. All other park furniture should be inspected and repaired or replaced as needed, including managing signage around the park and the bandstand.

**2. Maintenance and Restoration:** Establish a maintenance schedule for regular grass cutting and trimming to ensure the fields are in optimal condition. Regularly inspect and maintain park furniture and waste bins.

**3. Addressing Anti-Social Behaviour:** Engage the community in park activities and decision-making to foster a sense of ownership. Collaborate with enforcement agencies to conduct regular patrols, particularly during high-risk hours, ensuring a safe environment. Establish a clear and anonymous reporting mechanism for the public to report instances of anti-social behaviour.

**4. Preventing Traveller Incursion:** Implement a natural soil dump (bund) around the park's boundaries to create a barrier that deters unauthorised vehicle access. This bund will serve as an effective physical barrier against traveller incursions and minimise the need for additional infrastructure.

**5. Sustainability Initiatives:** Implement effective waste management systems to maintain a clean and litter-free park environment.

**6. Public Outreach and Education:** Enhance visitor awareness by installing educational signage throughout the park, highlighting its natural and cultural significance. Maintain an up-to-date website and active social media presence to inform the community about park developments and upcoming events.

**7. Funding and Resources:** Seek financial support through grant applications to finance conservation and restoration projects. Establish volunteer programs to engage community members actively in park maintenance and conservation initiatives.

**8. Monitoring and Evaluation:** Groundskeepers will conduct monthly park audits to assess progress and pinpoint areas requiring attention. To ensure community satisfaction and gather improvement suggestions, encourage public feedback through surveys and community meetings. Implement adaptive management by adjusting the conservation and management plan as needed based on audit results and community feedback.

**Conclusion:** This Conservation and Management Plan outlines a comprehensive strategy to preserve and enhance Pulborough Main Recreation Park. By addressing maintenance needs, sustainability initiatives, community engagement and traveller incursion prevention, the park can continue to be a cherished and well-maintained asset for the community. Ongoing monitoring and adaptation are key to ensuring the long-term success of these efforts.
