

PRESS RELEASE 4th December 2023

A huge crowd of well-wishers gathered on November 29th to celebrate the official opening of Pulborough Sheddars – a space for people to gather, talk and share skills in making or repairing items.

New Pulborough Sheddars HQ officially opened for business by Parish Council Chair.

The Pulborough Sheddars is a registered charity with a base in a temporary space above a garage off the A29 in Pulborough. It is kitted out with donations of tools, workbenches and flooring from many individuals, businesses, and community groups.

Pulborough Parish Council chair Len Ellis-Brown cut the ribbon to officially announce the Shed was open for business. He said:

“This is a much needed and positive space for people to communicate with each other and learn new skills. Pulborough Parish Council has been really keen to support this initiative which is a major asset for our community. We hope to help create a permanent home for it in the future.”

This is the first Shed to be set up in this area and it is part of a nationwide movement to create spaces for all that involve woodworking, metalworking and repairing but even more importantly, companionship, sharing and connections between people.

You can find out more about Pulborough Sheddars online at <https://www.pulboroughsheddars.org/> or on Facebook Pulborough Sheddars.
