*for Pulborough's future*

### Update on A29 landslip at Church Hill and traffic impacts on village roads

06.01.23

As at today we understand from West Sussex County Council that inspections of pot holes have been/are being undertaken of the various alternative roads being used by vehicles, and repairs effected following WSCC normal procedures. This will hopefully alleviate at least some of the road deterioration problems and potential vehicle damage being experienced.

We have also been advised that from 9<sup>th</sup>-31<sup>st</sup> January a minibus will transport secondary school students from The Weald to Pulborough, in place of the coach. It is hoped this will address an element of the congestion around school end time.

We appreciate that there are traffic related issues at other times of the day, especially rush hour traffic, and in other village roads such as Broomers Hill. We will continue to engage with WSCC and other authorities to press for urgent resolutions wherever possible.
